1991

we live  
**VISION  
ZERO**

VIZIJA  
**NIC**

Slovenija

NO FATALITIES  
OR SERIOUSLY  
INJURED PEOPLE  
RESULTING FROM  
ROAD CRASHES IN  
SLOVENIA

Each one of us can assist in the realization of **VISION ZERO** by taking the pledge or answering the following:

” What will I do to support the principles of safe mobility as an individual, a family member, an employee, NGO member, a member of my community, and as a citizen?

→ **Mobility these days is no longer a choice. It is a part of our everyday lives. Without it, we cannot live our lives. Yet, we must live in the here and now. We can choose to create a safer road transport system that supports safe mobility.**

**Safe mobility is our choice. We can show tolerance and respect towards the health and lives of others and ourselves consider the environment, our modern lifestyles, show kindness ...**

The VISION ZERO approach began in Sweden in 1994. Slovenia officially adopted the VISION ZERO in 2013, and began to carry out the program We Live VISION ZERO at the event commemorating the World Day of Remembrance for Road Traffic Victims, held in Ljubljana in 2017.
